

# COOL NAIL POLISH MARBLING TECHNIQUE

This is a really simple marbling technique that you can use to decorate lots of things - a phone case, glass or ceramic jewellery pot!

All you need is nail polish and water, it's super fun to do and the results will amaze you!

Beware you may become obsessed with this very cool marbling activity, so proceed at your own risk!

## WHAT YOU NEED

- Phone Case (or another item of your choice)
- Water
- Bowl or Plastic Container
- Nail Polish (various colours)
- Skewer
- Paper Towels

## INSTRUCTIONS

### Step 1

Lay out the paper towels - this activity can get messy, so always best to do the prep work first to avoid disaster!

### Step 2

Pour some water into your bowl or plastic container. Slowly drip your nail polish onto the surface of the water, do this lightly and it will float on top of the surface of the water. You may want to add a mix of colours or stick with the one colour scheme - it's up to you!

### Step 3

Create a marbled pattern using your skewer. Carefully drag the skewer through the nail polish.

**TIP:** Work quickly on this so you can marble the nail polish before it sets.

### Step 4

Grab your phone case and slowly dip it into the water, move the phone case all the way through the surface of the water so it picks up as much of the nail polish as possible. Give it a shake under the water, then lift it up to reveal your marbled pattern! Clean any edges off with the skewer and let it dry on the paper towels.
