

WHO LOVES GLITTER?! DIY GLITTER SHOES

Who loves glitter?! Everyone of course! So it's time to breathe new life into one of your old pair of sneakers by covering them in glitter glue!

This is a great rainy day activity - it'll keep you busy for hours and hours then at the end of it, you'll have a cool new pair of shoes to wear out with friends. DIY style!

WHAT YOU NEED

- Masking Tape
- Mixing Bowl
- Paint Brush
- Strong Craft Glue (2 cups)
- Glitter (loads of it!)
- Cling Wrap
- Canvas Shoes

INSTRUCTIONS

Step 1

Take the laces out of your shoes and if you're using old shoes give them a bit of a clean and dust off any dirt!

Step 2

Cover the rubber sole of the shoes and the ankle opening in masking tape. You want to cover any part of the shoe that you don't want covered in glitter with the tape.

Step 3

Time to make your glittery paste! Pour your glitter into your mixing bowl and add the craft glue. You're looking for the consistency of melted ice cream! It may look like the glue has dulled your sparkly glitter, but not to worry as the glue will dry clear!

Step 4

Using your paintbrush, paint on the glitter mixture all over the shoe. You can even paint on the glitter glue mixture and then sprinkle on even more glitter! Leave this to dry for around 12 hours and then repeat once more so you have a thick layer of glitter on your shoes. Paint one final layer of glue only on your shoes so your shoes will NEVER lose their sparkle.

TIP: Cover your glitter glue mixture with some cling wrap so it doesn't dry out while you're waiting for the shoes to dry!

Step 5

Pop the laces back on and you're ready for the weekend!
